

# Programming Languages 1

## Lesson 2

### Exercises:

1. Write a C program that reads int numbers from the keyboard, until 0 and prints back the sum of them to the screen.
  1. Write the program using a `while` loop.
  2. Learn how the `do-while` loop works.
  3. Modify the program to work using a `do-while` loop.
2. Write C program that prints out your name 10 times.
  1. Start as above.
  2. Learn how the `for` statement works.
  3. Write the program using `for` loop.
  4. Modify the program so that it prints out your name 100 times.
3. Write C program that reads 10 integer numbers, and prints them back in reverse order.
  1. Learn how you can define static arrays in C
  2. Write the program.
4. **Homework:** Write a C program that prints the even numbers from 10 to 100.
